

Press release

## **FlexiPDF 2022 released: New version of the popular "PDF word processor" with ribbons, automatic translation, digital signatures and document comparison**

**September 21, 2021 – The Nuremberg-based software manufacturer SoftMaker is releasing the latest version 2022 of its PDF editor FlexiPDF today. In addition to a completely new ribbon interface in the style of modern Office programs, the "PDF word processor" offers numerous new features such as automatic translation, digital signatures and document comparison of two PDF files.**

### **In summary:**

- The PDF editor FlexiPDF 2022 for Windows is now available.
- PDF editing as with a word processor: changing text and formatting, inserting images and drawings, page operations, etc., across paragraphs and pages
- Completely new ribbon user interface in the style of a modern Office application
- Numerous new features including automatic translation, extended document comparison, digital signatures, among many others
- Available either as a one-time purchase or subscription version

With FlexiPDF 2022 released today, the Nuremberg-based software manufacturer SoftMaker is living up to its reputation of offering the only "word processor for PDF files" on the market. While previous versions already enabled PDF text to be easily edited across paragraphs and pages, the new version now closes the last gap and also adapts the user interface to the style of modern Office applications. Users can now use the new ribbon interface to easily switch seamlessly between "classic" Office programs and the PDF editor. Commands can be found in familiar locations, which ensures ease of use for both new users and for those switching from previous versions.

Just as a word processor not only edits the text, but also all other design elements of a document, FlexiPDF 2022 also covers all other aspects of PDF editing and provides all page operations from adding pages and changing their order to removing them; objects such as images and drawings can be inserted, repositioned and deleted as desired; comments can be inserted and highlighting can be applied. Even a "Track Changes" feature for text changes is integrated. In short: FlexiPDF 2022 leaves nothing to be desired in terms of editing PDF files.

### **Numerous new features**

The range of functions has been significantly extended once again with the 2022 version. The insertion of digital signatures makes documents created with FlexiPDF "official", the extended comparison function automatically highlights differences between PDF documents, and the new translation function automatically translates entire PDF pages into numerous languages – while retaining their original layout. In addition, there are numerous functional improvements and convenient features. Thus, fans of dark user interfaces will now also get their money's worth with FlexiPDF as, in addition to a light version with elegant blue touches of color, the software offers a dark ribbon color scheme that is easy on the eyes – as well as a minimalist user interface style without accent colors.

Martin Kotulla, Managing Director of SoftMaker: *"Thanks to our decades of experience in the area of Office software, FlexiPDF 2022 has now enabled us to offer a user experience for editing PDF files that is every bit*

*as good as that of a modern Office suite. We are looking forward to showing users that FlexiPDF 2022 makes PDF editing as easy as working with a word processor."*

## **Available either as a one-time purchase or subscription version**

FlexiPDF Professional 2022 for Windows is available for €/US\$ 79.95 directly from the manufacturer and in stores. The subscription versions FlexiPDF NX Home and FlexiPDF NX Universal are available from the manufacturer's shop at [www.softmaker.com](http://www.softmaker.com) for €/US\$ 29.90 and €/US\$ 39.90 respectively per year. Existing customers can obtain the software at low upgrade prices.

A free trial version can be downloaded from the SoftMaker website at [www.softmaker.com](http://www.softmaker.com).

## **About SoftMaker**

Since its foundation in 1987, SoftMaker has been developing Office software: word processing software (TextMaker), spreadsheet software (PlanMaker) and presentation graphics (SoftMaker Presentations). The "flagship" product SoftMaker Office is available for Windows, Mac, Linux and Android. The outstanding features of SoftMaker software are ease of use, enormous compatibility with Microsoft Office and speed – these features coupled with fair prices constitute an unbeatable combination. SoftMaker's second productivity application is FlexiPDF, a PDF editor that makes editing PDF files as easy as working with a word processor. FlexiPDF offers the full functionality of a high-end PDF editing solution but without the high price. High-quality computer fonts constitute SoftMaker's third mainstay. The two product lines MegaFont and infiniType enable general end users as well as professional designers, printers and publishers to obtain font libraries of the highest quality.
