FlexiPDF NX and 2025: New version of the "PDF word processor" summarizes PDFs with ChatGPT and offers document tabs

October 16, 2024 – SoftMaker has officially launched the 2025 version of its PDF editor, FlexiPDF. This release introduces an AI-powered document summary feature using ChatGPT, marking a significant advancement in the software. Additionally, the new version boasts document tabs, enhanced language tools, a multi-page view, a "snapshot" function and a full-screen mode, making it more versatile and user-friendly.

In summary:

- The new versions of SoftMaker's PDF editor for Windows, FlexiPDF NX (subscription version) and FlexiPDF 2025 (purchase version), are now available.
- PDF editing in the style of a word processor: change text and formatting across paragraphs and pages, insert images and drawings, page operations, etc.
- Numerous new functions such as document tabs, integrated ChatGPT, "snapshots" to the clipboard and much more
- Available for purchase or subscription. Free trial version on the web site.

Work like in a word processor

With the release of FlexiPDF NX and 2025 today, the Nuremberg-based software manufacturer is releasing the latest version of its "word processor for PDF files". FlexiPDF offers a modern and clear user interface that allows users to edit PDF documents as if they were using a word processor. Editing text across paragraphs and pages is just as easy as inserting, replacing and moving images and drawings. From adding pages and changing their order to removing them, all page operations are also available. Comments and even tracked changes pose no problems for FlexiPDF.

Fully automatic translations of entire pages are integrated into the subscription version, FlexiPDF NX. For its translations, the software uses DeepL, generally accepted to be the best on the market. Translations are possible in 30 languages, and the original layout including all formatting is preserved during translation.

This provides everything you need for seamless PDF editing with FlexiPDF NX and 2025.

What's new?

FlexiPDF NX, the subscription version of the PDF software, now integrates artificial intelligence in the form of ChatGPT. This feature allows even large PDFs to be summarized at lightning speed, providing a quick overview of the most important content at the touch of a button. It's especially useful for busy office workers who need to efficiently extract information from extensive documents.

All other improvements have been added to both the purchase and subscription versions. FlexiPDF can now open PDFs in document tabs – similar to what users know from their web browser. The PDF display has been further enhanced, now allowing multiple pages to be viewed side by side, making better use of the available space on large monitors. Working in the new dark mode is now even more comfortable for the eyes, with the colors further darkened for an improved viewing experience.

It's uncommon for a PDF editor, but true to SoftMaker's motto, "FlexiPDF is a word processor for PDFs":

FlexiPDF 2025 and NX include both automatic hyphenation and a spell checker, featuring the latest Hunspell dictionaries.

Along with other useful enhancements, the new "Snapshot" feature completes the latest version of FlexiPDF: Users can easily select an area on the screen with the mouse and either save it as an image file or transfer it to other Windows programs via the clipboard for further use.

FlexiPDF works with Windows 11, 10, 8 and 7. FlexiPDF is also compatible with Windows Server and Remote Desktop Services (RDS).

Available either as a one-time purchase or via a subscription

SoftMaker is using the release of the new version to streamline and clarify its product lineup. From now on, there will be only two product variants:

- **FlexiPDF 2025** is the sole purchase version and costs €/US\$ 99.95. It is the successor to FlexiPDF Professional 2022.
- **FlexiPDF NX** is the sole subscription version and costs €/US\$ 39.90 per year. It is the successor to FlexiPDF NX Universal.

A free trial version is available for download and testing on the SoftMaker website at www.softmaker.de.

About SoftMaker

Since its foundation in 1987, SoftMaker has been developing office software: word processor (TextMaker), spreadsheet (PlanMaker) and presentation graphics (SoftMaker Presentations). The "flagship" product SoftMaker Office is available for Windows, Mac, Linux, iOS and Android. The outstanding features of SoftMaker software are ease of use, enormous compatibility with Microsoft Office and speed – these features coupled with fair prices constitute an unbeatable combination. SoftMaker's second productivity application is FlexiPDF, a PDF editor that makes editing PDF files as easy as working with a word processor. FlexiPDF offers the full functionality of a high-end PDF editing solution but without the high price. High-quality computer fonts constitute SoftMaker's third mainstay. The two product lines MegaFont and infiniType enable general end users as well as professional designers, printers and publishers to obtain font libraries of the highest quality.
