#### Work with PDFs as easily as in a word processor

With the 64-bit preview version of FlexiPDF NX and FlexiPDF 2025 released today, Germany-based software manufacturer SoftMaker is bringing the latest generation of its powerful PDF editor to the market. Thanks to native 64-bit technology, users benefit from noticeably increased speed and smooth processing even of large PDF documents.

FlexiPDF combines the power of a PDF editor with the ease of use of a word processor. Text can be edited across paragraphs and pages, and graphics and drawings can be flexibly inserted, replaced or moved. Page operations such as inserting, rearranging or deleting pages are performed intuitively and efficiently. Professional tools such as commenting functions and change tracking ensure seamless teamwork.

New in FlexiPDF NX and 2025 is the multi-page display, which provides an even better overview on large monitors. The practical tab view allows parallel work with multiple PDF files. The optimized dark mode supports eye-friendly work, while the new snapshot feature saves arbitrary screen areas as images or transfers them directly to other programs.

A powerful combination of artificial intelligence and machine translation is available exclusively with a subscription to FlexiPDF NX: The integrated DeepL function enables entire pages to be automatically translated into one of 30 languages and retains the original layout and formatting.

In addition, FlexiPDF NX uses ChatGPT to create precise content summaries of large documents in a matter of seconds – ideal for those needing a quick overview.

FlexiPDF NX and FlexiPDF 2025 provide an comprehensive solution for anyone who regularly works with

PDF files – whether in the office, at home or on the go.

FlexiPDF is compatible with Windows 11, 10, 8 and 7 as well as with Windows Server and Remote Desktop Services (RDS).

Since its foundation in 1987, SoftMaker has been developing office software: word processor (TextMaker), spreadsheet (PlanMaker) and presentation graphics (SoftMaker Presentations). The "flagship" product SoftMaker Office is available for Windows, Mac, Linux, iOS and Android. The outstanding features of SoftMaker software are ease of use, enormous compatibility with Microsoft Office and speed – these features coupled with fair prices constitute an unbeatable combination. SoftMaker's second productivity application is FlexiPDF, a PDF editor that makes editing PDF files as easy as working with a word processor. FlexiPDF offers the full functionality of a high-end PDF editing solution but without the high price. High-quality computer fonts constitute SoftMaker's third mainstay. The two product lines MegaFont and infiniType enable general end users as well as professional designers, printers and publishers to obtain font libraries of the highest quality.
