

Press release

The final 64-bit version of the PDF editor FlexiPDF is now available

October 7, 2025 – The Nuremberg-based software company SoftMaker released the completed 64-bit version of its PDF editor FlexiPDF today. The application is now available as a native 64-bit version with improved performance, higher processing speed and the ability to work even with extremely large PDF documents.

In summary:

- FlexiPDF is now available as a fully native 64-bit version.
- The revamped application processes even extremely large PDF files quickly and reliably.
- Features include AI-based content summaries with ChatGPT, translations with DeepL, document tabs and built-in language tools.
- Licensing flexibility: FlexiPDF is available as a one-time purchase or by subscription.

Work with PDFs as easily as in a word processor

With the release of the 64-bit version of FlexiPDF NX and FlexiPDF 2025, SoftMaker is introducing a new level of performance for its PDF software. The native 64-bit technology ensures faster opening and editing of PDFs and can effortlessly open even extremely large PDF files, thanks to access to the entire 64-bit memory space.

What remains tried and true: FlexiPDF continues to be the best PDF editor for editing text and graphics in PDFs. With FlexiPDF, making changes feels like using a word processor: editing text across paragraphs, columns and pages is just as effortless as creating new sections of text and ensuring quality with spell check and hyphenation.

Page operations such as inserting, rearranging or deleting pages are performed intuitively and efficiently. Tools like comment features and track changes support collaboration.

New in FlexiPDF NX and 2025 is the multi-page display, which provides an even better overview on large monitors. The practical tab view allows parallel work with multiple PDF files. The optimized dark mode supports eye-friendly work, while the new snapshot feature saves arbitrary screen areas as images or transfers them directly to other programs.

The subscription version FlexiPDF NX also includes:

- **DeepL translations:** Automatic translation of entire pages into 30 languages while preserving the layout
- **AI-powered summaries with ChatGPT:** Quick precise summaries of PDF content – perfect for a quick overview

FlexiPDF NX and FlexiPDF 2025 provide a comprehensive solution for anyone who regularly works with PDF files – whether in the office, at home or on the go.

FlexiPDF is compatible with Windows 11, 10, 8 and 7 as well as with Windows Server and Remote Desktop

Services (RDS).

Flexible choice of purchase or subscription

FlexiPDF is available in two versions:

- **FlexiPDF 2025** is the classic permanent version at a one-off price of €/US\$99.95.
- **FlexiPDF NX** is the subscription version with all premium functions, including ChatGPT and DeepL translation, and costs €/US\$39.90 per year.

A free trial version is available for download and testing on the SoftMaker website at www.softmaker.com.

About SoftMaker

Since its foundation in 1987, SoftMaker has been developing office software: word processor (TextMaker), spreadsheet (PlanMaker) and presentation graphics (SoftMaker Presentations). The "flagship" product SoftMaker Office is available for Windows, Mac, Linux, iOS and Android. The outstanding features of SoftMaker software are ease of use, enormous compatibility with Microsoft Office and speed – these features coupled with fair prices constitute an unbeatable combination. SoftMaker's second productivity application is FlexiPDF, a PDF editor that makes editing PDF files as easy as working with a word processor. FlexiPDF offers the full functionality of a high-end PDF editing solution but without the high price. High-quality computer fonts constitute SoftMaker's third mainstay. The two product lines MegaFont and infiniType enable general end users as well as professional designers, printers and publishers to obtain font libraries of the highest quality.
