

Press release

Mobile office perfection: SoftMaker Office 2024 for iOS and Android enters public beta testing

November 15, 2023 – Starting today, SoftMaker invites all users to the public beta test of SoftMaker Office 2024 for iOS and Android, the only complete Office suite for smartphones and tablets. With the word processing software TextMaker, the spreadsheet software PlanMaker and the presentation program Presentations, all three of SoftMaker's Office programs are available for testing and trying out free of charge.

In summary:

- SoftMaker Office 2024 for iOS and Android enters public beta testing today.
- The word processor *TextMaker*, the spreadsheet program *PlanMaker* and the presentation program *Presentations* can be downloaded free of charge from the Apple App Store and Google Play.
- SoftMaker Office for iOS and Android is the only mobile Office suite with the full range of functions of a desktop Office solution.
- SoftMaker Office works with ribbons on tablets and with a user interface optimized for one-handed operation on smartphones.
- As with SoftMaker Office on the PC, the mobile versions open and save files in the Microsoft file formats DOCX, XLSX and PPTX.

With SoftMaker Office for iOS and Android, you can easily create documents, calculations and presentations on the go – at no charge!

SoftMaker Office for iOS and Android is an Office suite with the focus on the mobile world. It gives mobile users access to all functions of a desktop Office suite – with a user interface designed for smartphones and tablets.

As customary with SoftMaker Office, document exchange with Microsoft Word, Excel and PowerPoint works losslessly in both directions.

Word processor: TextMaker

The word processor **TextMaker** enables users to create and edit documents on their tablets or smartphones just like on a Mac or PC.

The automatic spell checker corrects texts in more than 70 languages. Stylesheets, tables and graphics, cross-references, footnotes, index tables and figure captions work just as they do under Windows or on the Mac. TextMaker supports saving and loading in cloud storage systems such as iCloud, Dropbox, Google Drive, etc. and saves its documents in the popular DOCX format to ensure data exchange with Microsoft Word 2021 and Office 365.

Spreadsheet program: PlanMaker

The spreadsheet program **PlanMaker** takes care of calculations and turning them into appealing charts. PlanMaker impresses with the complete range of functions already familiar from spreadsheet applications on the Mac or under Windows.

More than 430 Excel-compatible calculation functions and 80 Excel-compatible chart types are available. Precise data analysis is made possible with the help of professional functions such as pivot tables, data tables and data consolidation. Practical helpers such as syntax highlighting and the "detective" make it

easier to find errors in worksheets. PlanMaker reads and writes files in the popular XLSX format known from Microsoft Excel 2021 and Office 365.

Presentation graphics: Presentations

The presentation software part of the package is handled by the **Presentations** app. It opens and saves PowerPoint files in the familiar PPTX format true to the original and plays slide shows with all the animations and slide transitions they contain. Multimedia elements such as movies and music can also be played back.

Additionally, Presentations also enables users to create and edit presentations like on a desktop computer. To facilitate the user's work, SoftMaker has included numerous design templates and slide styles with the app. The range of functions is just as extensive as in the Mac and Windows versions of Presentations.

The three applications TextMaker, PlanMaker and Presentations are available **free of charge** – most of the functions can be used permanently without payment. A few advanced functions can be activated via Google Play or the Apple App Store. Users of SoftMaker Office NX can use these additional functions free of charge.

About SoftMaker

Since its foundation in 1987, SoftMaker has been developing Office software: word processing software (TextMaker), spreadsheet software (PlanMaker), presentation graphics (SoftMaker Presentations) and database software (DataMaker). The "flagship" product SoftMaker Office is available for Windows, Mac, Linux, iOS and Android. The outstanding features of SoftMaker software are ease of use, enormous compatibility with Microsoft Office and speed – these features coupled with fair prices constitute an unbeatable combination. SoftMaker's second productivity application is FlexiPDF, a PDF editor that makes editing PDF files as easy as working with a word processor. FlexiPDF offers the full functionality of a high-end PDF editing solution but without the high price. High-quality computer fonts constitute SoftMaker's third mainstay. The two product lines MegaFont and infiniType enable general end users as well as professional designers, printers and publishers to obtain font libraries of the highest quality.
