

Press release

SoftMaker Office for Android:

The only complete mobile office now available as a public beta

Nuremberg, March 23, 2021 – As of today, SoftMaker is inviting all Android users to participate in the public beta test of the new SoftMaker Office for Android, the only mobile Office suite with functionality similar to a PC. It consists of the word processing software TextMaker, the spreadsheet software PlanMaker and the presentation software Presentations. For the first time ever, SoftMaker is introducing a mobile Office suite that is perfectly tailored to use on both tablets and smartphones.

In summary:

- As of today, SoftMaker Office for Android will be available as a public beta.
- The word processing software TextMaker, the spreadsheet software PlanMaker and the presentation software Presentations can be downloaded free of charge from the Google Play Store.
- SoftMaker Office for Android is the only mobile Office suite with the full functionality of a desktop office solution.
- SoftMaker Office for Android works with ribbons on tablets, while it works with a user interface that is optimized for one-handed use on smartphones.
- As is customary with SoftMaker products, the Android variant opens and stores files seamlessly in the Microsoft file formats DOCX, XLSX and PPTX.

Work as conveniently with SoftMaker Office for Android as you do on your PC – free of charge!

What was previously unavailable on Android has now become reality: With SoftMaker Office for Android, an Office suite developed specifically for Android tablets and smartphones, you can use all of the functions of a desktop Office suite on the go for the first time – and with its use designed specifically for smartphones and tablets! Documents can be created easily, quickly and intuitively in this manner.

As is customary with SoftMaker Office, document exchange with Microsoft Word, Excel, and PowerPoint works losslessly in both directions. In short: There is nothing that can still only be done on your PC – everything is now possible on tablets and smartphones with SoftMaker Office for Android!

TextMaker for Android: Complete word processing software

The word processing software TextMaker for Android allows you to create and edit documents on your tablet and smartphone in the same manner as you would with a PC. SoftMaker has provided the full functionality which is familiar from Windows.

This range of features starts with an automatic spell check in 20 languages, extends across style templates, tables and pictures, and culminates in such functions as cross-references, footnotes, indexes and figure captions. Storage in cloud services such as Dropbox and Google Drive is also possible, of course. TextMaker for Android saves its documents in the popular DOCX format, ensuring lossless data exchange with Microsoft Word 2007 to 2019 and Word 365. Furthermore, formats such as OpenDocument, RTF, and HTML are supported.

PlanMaker for Android: Complete spreadsheet software

The spreadsheet software PlanMaker for Android is responsible for calculating and displaying calculations. It also excels with the full functionality which is familiar from Windows.

It does so by providing over 430 Excel-compatible calculation functions and 80 Excel-compatible chart types. Sophisticated analysis features such as syntax highlighting and the “detective” make it easier to locate errors. Professional tools such as pivot tables, data tables and conditional formatting highlight the professional requirements of the program. PlanMaker reads and writes files in the widespread XLSX format of Microsoft Excel.

Presentations for Android: Complete presentation graphics

The package is rounded off with the presentation software Presentations for Android. This enables PowerPoint files in the common PPTX format to be opened and saved in an identical format to the original documents. Slide shows are played back with all the animations, slide transitions and sound clips they contain.

Presentations for Android also allows you to fully create and edit presentations. For this purpose, SoftMaker has included numerous design templates and slide styles which facilitate the user’s work by reducing it. The editing features are as extensive as in the Windows version.

The three applications TextMaker for Android, PlanMaker for Android and Presentations for Android are available **free of charge** – almost all features can be used permanently without payment. A few advanced functions can be unlocked via Google Play. Users of SoftMaker Office NX can use these additional features free of charge.

About SoftMaker

Since its foundation in 1987, SoftMaker has been developing Office software: word processing software (TextMaker), spreadsheet software (PlanMaker), presentation graphics (SoftMaker Presentations) and database software (DataMaker). The “flagship product” SoftMaker Office is available for Windows, Mac, Linux and Google Android. The outstanding features of SoftMaker software are ease of use, enormous compatibility with Microsoft Office and speed – these features coupled with fair prices constitute an unbeatable combination. SoftMaker’s second productivity application is FlexiPDF, a PDF editor that makes editing PDF files as easy as working with a word processor. FlexiPDF offers the full functionality of a high-end PDF editing solution but without the high price. High-quality computer fonts constitute SoftMaker’s third mainstay. The two product lines MegaFont and infiniType enable general end users as well as professional designers, printers and publishers to obtain font libraries of the highest quality.
