SoftMaker Office for iOS in public beta testing: The only complete mobile Office now also available for iPhones and iPads

April 26, 2022 – SoftMaker Office is now available on iPhones and iPads! SoftMaker is inviting all users to participate in the public beta test of the new SoftMaker Office for iOS, the only mobile Office suite with the same functionality as on a Mac or PC. With the word processing software TextMaker, the spreadsheet software PlanMaker and the presentation program Presentations, all three of SoftMaker's Office programs are available for testing and trying out free of charge.

In summary:

- The public beta test of SoftMaker Office for iOS is starting today.
- The word processing software *TextMaker*, the spreadsheet software *PlanMaker* and the presentation software *Presentations* can now be downloaded free of charge from the App Store.
- SoftMaker Office for iOS is the only mobile Office suite with the full functionality of a desktop office solution.
- SoftMaker Office works with ribbons on an iPad and with a user interface optimized for one-handed operation on an iPhone.
- As is customary with SoftMaker products, the iOS variant opens and stores files seamlessly in the Microsoft file formats DOCX, XLSX and PPTX.

SoftMaker Office for iOS enables you to easily write, calculate and present on the go – free of charge!

What was previously unavailable for an iPhone or iPad has now become reality: SoftMaker Office for iOS, an Office suite specially developed for Apple's mobile world. SoftMaker Office enables you to also use all of the functions of a desktop Office suite on the go – and with its use designed specifically for iPhones and iPads.

As is customary with SoftMaker Office, document exchange with Microsoft Word, Excel and PowerPoint works losslessly in both directions.

TextMaker for iOS: The complete word processing software

The word processing software **TextMaker for iOS** allows you to create and edit documents on your iPad and iPhone in the same manner as you would on a Mac or PC. The full functionality, which is already familiar from a Mac or PC, is available.

This starts with an automatic spell check in more than 20 languages, extends across style templates, tables and pictures, and culminates in such functions as cross-references, footnotes, indexes and figure captions. Storage and loading in cloud services such as iCloud, Dropbox and Google Drive is also possible, of course. TextMaker for iOS saves its documents in the popular DOCX format, ensuring lossless data exchange with Microsoft Word 2007 to 2021 and Word 365.

PlanMaker for iOS: The complete spreadsheet software

The spreadsheet software **PlanMaker for iOS** is responsible for calculating and visualizing calculations. It also excels with the full functionality which is familiar from macOS or Windows.

It does so by providing over 430 Excel-compatible calculation functions and 80 Excel-compatible chart types. Sophisticated analysis features such as syntax highlighting and the “detective” make it easy to detect and locate errors. Professional tools such as pivot tables, data tables and conditional formatting highlight the professional requirements of the program. PlanMaker seamlessly reads and writes files in the popular XLSX format of Microsoft Excel.

Presentations for iOS: The complete presentation software

The package is rounded off with the presentation software **Presentations for iOS**. This enables PowerPoint files in the familiar PPTX format to be opened and saved in an identical format to the original documents. Slide shows are shown with all the animations and slide transitions they contain. Multimedia elements such as sound clips and music are also played back.

Presentations for iOS also allows you to fully create and edit presentations. For this purpose, SoftMaker has included numerous design templates and slide styles which facilitate the user’s work by reducing it. The editing functions are just as extensive as in the familiar Mac and Windows versions of Presentations.

The three applications TextMaker for iOS, PlanMaker for iOS and Presentations for iOS are available **free of charge** – almost all features can be used permanently without payment. A few advanced functions can be unlocked via the App Store. Users of SoftMaker Office NX can use these additional features free of charge.

About SoftMaker

Since its foundation in 1987, SoftMaker has been developing Office software: word processing software (TextMaker), spreadsheet software (PlanMaker), presentation graphics (SoftMaker Presentations) and database software (DataMaker). The "flagship" product SoftMaker Office is available for Windows, Mac, Linux, iOS and Google Android. The outstanding features of SoftMaker software are ease of use, enormous compatibility with Microsoft Office and speed – these features coupled with fair prices constitute an unbeatable combination. SoftMaker’s second productivity application is FlexiPDF, a PDF editor that makes editing PDF files as easy as working with a word processor. FlexiPDF offers the full functionality of a high-end PDF editing solution but without the high price. High-quality computer fonts constitute SoftMaker’s third mainstay. The two product lines MegaFont and infiniType enable general end users as well as professional designers, printers and publishers to obtain font libraries of the highest quality.
