Press release

SoftMaker Office for iOS released:
Free Office suite for iPhones and iPads with an extensive feature set

June 8, 2022 – SoftMaker is releasing the long-awaited SoftMaker Office for iOS today. This release enables SoftMaker to provide its popular Office apps for the first time for iPhones and iPads. TextMaker, PlanMaker and Presentations offer a feature set which was previously unknown on iOS and can now be downloaded free of charge from the Apple App Store.

In summary:

- SoftMaker Office for iOS can be downloaded free of charge from the Apple App Store as of today.
- The suite includes three apps: the word processing software *TextMaker*, the spreadsheet software *PlanMaker* and the presentation software *Presentations*.
- The suite's extensive feature set enables mobile editing of documents at the level of a professional desktop office solution.
- The apps offer customized user interfaces for use on iPhones and iPads.
- SoftMaker Office's seamless compatibility with Microsoft Office file formats is acknowledged in the market. Similarly, the new apps for iOS seamlessly open and save Microsoft Office files in DOCX, XLSX and PPTX formats.

Use SoftMaker Office for iOS to edit documents on the go in as professional a manner as on your Mac or PC

With SoftMaker Office for iOS that is being released today, iPhone and iPad users can now edit their documents on the go in the same manner as on their Mac or PC at home. While the mobile Office apps of other providers usually have only a limited feature set, SoftMaker promises a feature set that leaves nothing to be desired. Everyone can now see this for themselves because SoftMaker is making its Office apps for iOS available **free of charge** in the Apple App Store.

A highlight of the apps is the user interface that was developed specifically for phones and tablets. A ribbon interface is available for iPads, while a user interface that was optimized for one-handed use is available for iPhones. Documents can be created easily, quickly and intuitively in this manner.

Similar to the desktop version of SoftMaker Office, the iOS version also offers seamless compatibility with Microsoft Office. Due to the native support for DOCX, XLSX and PPTX file formats, document exchange with Microsoft Word, Excel and PowerPoint works losslessly in both directions.

TextMaker for iOS: Word processing software

The word processing software TextMaker allows users to edit documents on the go as well as on their Mac or PC. The feature set corresponds to that of a complete desktop word processor. For example, TextMaker offers an automatic spell check in 20 languages, style templates, tables and pictures and advanced functions such as cross-references, footnotes, indexes and figure captions. Storage in cloud services such as iCloud or Dropbox is also possible, of course.

TextMaker for iOS saves its documents in Microsoft's DOCX format, ensuring lossless data exchange with Microsoft Word 2007 to 2021 and Word 365. Formats such as OpenDocument Text, RTF and HTML are also supported.

PlanMaker for iOS: Spreadsheet software

The spreadsheet software PlanMaker is responsible for creating calculations, worksheets and charts. Over 430 Excel-compatible calculation functions and 80 Excel-compatible chart types are just a few of the many options provided by PlanMaker. Sophisticated analysis features such as syntax highlighting and the "detective" make it easy to locate errors. Professional tools such as pivot tables, data tables and conditional formatting highlight the professional requirements of the program. PlanMaker reads and writes files in the widespread XLSX format of Microsoft Excel.

Presentations for iOS: Presentation software

The suite is rounded off with the presentation software Presentations for iOS, which opens and saves PowerPoint files in Microsoft format PPTX in an identical format to the original documents. Slide shows are played back with all the animations and slide transitions they contain; multimedia elements such as sound clips, music and videos can also be played back.

Presentations for iOS also allows you to fully create and edit presentations. For this purpose, SoftMaker has included numerous design templates and slide styles which facilitate the user's work by reducing it. In this case also, the editing functions are just as extensive as in the Windows version.

The three apps TextMaker, PlanMaker and Presentations for iOS are available **free of charge** in the Apple App Store and can be used **permanently** at no subsequent cost. A number of additional advanced functions can also be unlocked via an inexpensive subscription. Users of SoftMaker Office NX can use these additional features free of charge.

About SoftMaker

Since its foundation in 1987, SoftMaker has been developing Office software: word processing software (TextMaker), spreadsheet software (PlanMaker), presentation graphics (SoftMaker Presentations) and database software (DataMaker). The "flagship" product SoftMaker Office is available for Windows, Mac, Linux, Android and iOS. The outstanding features of SoftMaker software are ease of use, enormous compatibility with Microsoft Office and speed – these features coupled with fair prices constitute an unbeatable combination. SoftMaker's second productivity application is FlexiPDF, a PDF editor that makes editing PDF files as easy as working with a word processor. FlexiPDF offers the full functionality of a high-end PDF editing solution but without the high price. High-quality computer fonts constitute SoftMaker's third mainstay. The two product lines MegaFont and infiniType enable general end users as well as professional designers, printers and publishers to obtain font libraries of the highest quality.
